With over 80 years' experience in the maritime industry, Magam Safety is among the market leaders in the design and manufacture of marine safety and survival equipment. As chosen supplier of some of the leading names between Navies across the globe, our mission is to deliver the best value, safety and survival solutions.

Magam Safety's professional rubber boats are a unique range of larger inflatables. The boats have been designed to meet the high level of requirements expected by professional users. The crafts are easy to assemble, inflate and launch.

Magam Safety's professional rubber boats use heavy materials and are reinforced throughout making them suitable for extreme service. Even at sizes up to 7 M, they can still be rolled up into a bag and thrown into the back of a pickup truck or aircraft.

As an official supplier of the Israeli Navy and other commando units around the world, the boats has been used and tested on multiple sites and applications for many years. The highest levels of expertise in design and manufacturing goes into producing the Boats range, thus making them first choice for the true professional user, where quality counts.
